

Multiplication and Division

These problems are all about 6, 3, and 18.
What is missing? Complete each fact.

1. $6 \times \underline{\quad} = 18$

2. $3 \times \underline{\quad} = 18$

7. $\underline{\quad} \div 6 = 3$

8. $18 \div 3 = \underline{\quad}$

How many squares are there in all? Write the missing numbers.

11. There are 32 squares in all. How many columns are there?

$32 \div \underline{\quad} = \underline{\quad}$
