

# Adding with Decimals

Complete the number sentences.

$$\textcircled{1} \quad 6 + 4.6 = \underline{\hspace{2cm}}$$

$$6.7 + 4 = \underline{\hspace{2cm}}$$

$$6.7 + 4.6 = \underline{\hspace{2cm}}$$

$$67 + 46 = \underline{\hspace{2cm}}$$

$$0.67 + 0.46 = \underline{\hspace{2cm}}$$

$$\textcircled{2} \quad 5.3 + 2 = \underline{\hspace{2cm}}$$

$$5 + 2.8 = \underline{\hspace{2cm}}$$

$$\begin{array}{r} 5.3 \\ + 2.8 \\ \hline \end{array} \qquad \begin{array}{r} 53 \\ + 28 \\ \hline \end{array} \qquad \begin{array}{r} 0.53 \\ + 0.28 \\ \hline \end{array}$$

$$\textcircled{3} \quad 4.6 + 3 = \underline{\hspace{2cm}}$$

$$46 + 38 = \underline{\hspace{2cm}}$$

$$4 + 3.8 = \underline{\hspace{2cm}}$$

$$\begin{array}{r} 0.46 \\ + 0.38 \\ \hline \end{array} \qquad \begin{array}{r} 0.046 \\ + 0.038 \\ \hline \end{array} \qquad \begin{array}{r} 0.46 \\ + 3.8 \\ \hline \end{array}$$

$$4.6 + 3.8 = \underline{\hspace{2cm}}$$

$$4.6 + 0.38 = \underline{\hspace{2cm}}$$

## Test Prep

- $\textcircled{4}$  Renee's kitchen floor is a rectangle greater than 60 square feet, but less than 70 square feet in area. Each dimension of the floor is greater than 6 feet and the floor is perfectly tiled with 1-foot square tiles, none of which have been cut. What could the area be? Explain.
