

Number and Operations

Find the product.

1 $\frac{3}{4}$

$\frac{3}{4} \times \frac{2}{3} = \square$

2 $\frac{2}{5}$

$\frac{2}{5} \times \frac{1}{2} = \square$

3 $\frac{3}{4}$

$\frac{3}{4} \times \frac{3}{4} = \square$

Measurement

Write an equivalent measure for the given measure.
Then estimate the number of units.

4

1 qt 1 qt 1 qt 1 qt 1 qt = _____ gal

5 quarts are about _____ liters

5

1 c 1 c 1 c 1 c 1 c 1 c 1 c 1 c 1 c = _____ qt

9 cups are about _____ liters

6 11 cups = _____ quarts

11 cups are about _____ liters

7 $1\frac{3}{4}$ gallons = _____ quarts

$1\frac{3}{4}$ gallons are about _____ liters

8 $3\frac{1}{4}$ quarts = _____ cups

9 15 pints = _____ cups

10 9 gallons = _____ pints

11 $5\frac{1}{2}$ pints = _____ cups
